👤 Professional Summary

Undergraduate student in Systems Analysis and Development, focused on creating multi-demo WordPress themes. I produce my own personalized projects, designed with my unique UI/UX style to deliver distinctive visual and functional experiences. In addition to continuously studying new technologies, I develop digital solutions that can help other people and businesses.

📁 Experience

Systems Support Internship

INFORPLACE INFORMATICA 2024 – 2025

- ▶ Assisting in the maintenance and operation of business management systems.
- ▶ Providing technical support to users, identifying and correcting basic software problems.
- ▶ Assisting in data manipulation and querying in databases.
- ▶ Supporting process documentation and collaborating with the team on system improvements.

WordPress Theme Creator

Personal Project 2025 – Present

- ▶ Development of a modular and optimized blog theme, using template-parts for a clean and reusable codebase.
- ▶ Deep integration with the WordPress Customizer for full control over colors, typography, and layout, including a complete dark mode.
- ▶ Implementation of AJAX-based pagination and post loading, providing a fast and seamless user experience without page reloads.
- ▶ Creation of custom widgets for trending posts, popular tags, and author profiles, extending WordPress's core functionality.
- ▶ Project developed following strict WordPress coding standards.

Academic Education

Undergraduate in Systems Analysis and Development

Universidade Estácio de Sá – Brazil
2023 – 2025

Courses and Certifications

Full Stack Web Development Bootcamp

Ímã Tech
06/15/2023 – 11/04/2023

At the Full Stack Web Development bootcamp at Ímã Tech, I honed essential skills. I strengthened soft skills, such as teamwork and project management, through collaborative projects that required effective communication and empathy. Additionally, I acquired practical knowledge in HTML, CSS, and JavaScript, applying them in projects that resulted in interactive and responsive web solutions. The bootcamp experience not only consolidated my technical skills but also contributed to my comprehensive professional development.

Self-taught Skills

UX/UI Design

Self-taught through research, hands-on practice, and studying digital design references.

WordPress Themes (In progress)

Ongoing development of custom themes, exploring advanced WordPress practices and creating responsive layouts.
